

# ASWOOD paving : Paving that co-exists with nature

## 아스우드 포장 : 자연과 공존하는 포장법

### What is ASWOOD paving?

Paving created by combining wood chips and rubber modified asphalt emulsions at normal temperature.

Being provided with excellent features such as elasticity comfortable for walking and high water permeability, it harmonizes with the natural environment and is human friendly.

An application example for a walking trail

An application example for a garden path

### Features

- Cushioning characteristics comfortable for the feet
- High rainwater permeability, forming no puddles
