

Normal temperature repairing material for all-weather and high durability type Asphalt firming up securely

전천후형, 고내구형의 상온 보수 자재 단단히 굳는 아스팔트

"콜드파믹스 (포러스아스팔트 혼합물)"

Features

- Being free from ambient temperature change, the product is easy to handle.
- Due to the blend of special resin, it has excellent durability and water resistance.
- Since it also has excellent water resistance and adhesion properties, it is applicable to wet pavement.
- Since the mixture has high early strength, the pavement can be opened to public transportation immediately after construction.
- If the material stays unopened, it can be preserved for a long period.

Uses

- Provisional recovery and full recovery associated with repair works of structural objects
- Repair works for pot holes
- Back-filling after coring work
- Repair work for unevenness
- Pavement around a house and doorstep, etc.

Method of using

Cleaning

Laying the material after opening the package

Forming the surface by a trowel, etc.

Surface compaction
